

SHRI G.S. INSTITUTE OF TECHNOLOGY AND SCIENCE

DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCES

English Language Lab Manual

Name:-----

Roll. No.-----

English language lab Setup:

The language laboratory caters to the needs of students to learn, understand and improve language skills. The LL runs with 41 PCs and required software from reputed digital language lab software provided. The lab is occupied 100% of the time. On Saturdays and Holidays, it is available for other users.

Syllabus of the Subject:

DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCES

I Year BE (4YDC)

HU 10651 TECHNICAL ENGLISH

HOURS PER WEEK			CREDITS		MAXIMUM MARKS				
L	T	P	Th	Pr	THEORY		PRACTICAL		TOTAL MARKS
3	-	2	3	1	CW	END SEM	SW	END SEM	150
					30	70	20	30	

PRE-REQUISITE:

The student must possess basic knowledge of English Grammar and basic ability to read, write and speak English language

COURSE OBJECTIVES:

1. To enable the students to recognize the relationship of effective communication skills to succeed in academic, work and social environments.
2. To develop both written and oral communication skills.
3. To produce clear, complete and accurate messages in business correspondence.
4. To improve English phonetics enabling the students to speak and write English correctly and with confidence.

COURSE OUTCOMES:

After successful completion of the course, *students will develop competency in the following areas:*

1. Communicate effectively with good interpersonal skills; speak in public, engage the audience, make a presentation using Power-Point and tackle group discussion.
2. Speak English with clarity using correct pronunciation and accent in all situations
3. Comprehend a particular piece of information, absorb what is read and hone the art of condensation and effective writing skills with correct syntax and grammar in all formal situations.
4. Collect, analyze, document, and report information clearly, concisely and logically. Also, apply technical information and knowledge in practical documents.
5. Produce clear, complete, concise, concrete and precise messages in day to day business transactions while drafting applications and E-Mails.

COURSE CONTENT:

UNIT 1: Communication Skills:

Meaning & process of communication skills and significance of effective communication, Presentation Strategies: Techniques of Oral Presentations, Defining the Purpose, Analyzing the Audience, Establishing the main idea, Selecting the Appropriate Channel and Medium. Power Point Presentation. Group Discussion.

UNIT 2: Application of Linguistic Ability

English IPA: Types of speech sounds; Monophthongs, Diphthongs, Consonants and Phonetic Transcription

UNIT 3: Advanced Writing Skills:

Composition : Meaning and Significance, Exercise on free essay writing on technical and current topics with particular emphasis on clear expressions, Precis writing: Reading and Comprehension, Basic rules and practice of writing précis.

UNIT 4: Technical Report Writing:

Introduction: Meaning and importance, Features, Principles, Structure and Format, Samples and Models for practice

UNIT 5: Business Correspondence

Introduction: Business & Official letters, Structure and Layout of Business letters, Types of Letters: Job Application, Letters of enquiry, Quotations, Orders and Complaints. E-Mail writing

PRACTICALS:

LIST OF ACTIVITIES AND SOFTWARE MODULES	
SESSION 1	1.INTRODUCTION TO THE LAB 2.SELF INTRODUCTION
SESSION 2	1.TENSE BUSTER ELEMENTARY. 2.PRACTICE OF GROUP DISCUSSION
SESSION 3.	1.TENSE BUSTER LOWER INTERMEDIATE 2.MAKING TECHNICAL REPORT (GROUP)
SESSION 4.	1.TENSE BUSTER INTERMEDIATE 2.TENSE BUSTER UPPER INTERMEDIATE

SESSION 5.	1.TENSE BUSTER ADVANCED 2.PRESENTATIONS OF TECHNICAL REPORT
SESSION 6.	1.BUSINESS WRITING 2.STUDY SKILLS SUCCESS
SESSION 7.	1.CLEAR PRONUNCIATION 1 2.CLEAR PRONUNCIATION 2
SESSION 8.	1.MOCK VIVA 2.ROLE PLAYS
SESSION 9.	SHOWING VIDEOS RELATED TO THEORY SYLLABUS
SESSION 10	1.QUIZ 2.DEBATE

ASSESSMENT: Through End-Sem. Theory Exam, Theory sessionals, Mid-Sem Tests, Assignments, End-Sem. Practical Exam, Practical sessionals, quizzes, and presentations.

BOOKS RECOMMENDED:

1. Sharma, R.C. and Krishna Mohan, *Business Correspondence and Report Writing*, New Delhi: Tata McGraw-Hill, 2009.
2. Raman, Meenakshi and Sangeeta Sharma, *Technical Communication*, New Delhi: Oxford Univ. Press, 2011.

3. Magan, Sangeeta, *Business Communication*, New Delhi: Biztantra Publications, 2010.

METHODOLOGY:

1. Theory: The lectures are engaged in theory classes and all the topics in the syllabus are covered.
2. Practicals: The topics covered during theory classes are practiced with the help of examples and modules. **Modules:-**

Tense Buster 2001 Elementary

- Using Tense Buster
- Am, is, are
- Simple Present
- Negatives
- Questions
- I, me, my
- A, an, the
- Countable
- Some, any
- Have got

Tense Buster 2001 Intermediate

- Using Tense Buster
- Equality
- The Passive
- Relative Clauses
- Will and going to
- Conditionals
- Vocabulary
- How to learn faster

Tense Buster 2001 Advanced

- Using Tense Buster
- Past Perfect
- Articles
- Reported Speech

- Passives
- Phrasal Verbs
- Vocabulary
- How to learn faster

Business Writing

- Successful Writing
- Organizing Information
- Writing clearly and appropriately
- Linking ideas
- The business letter: Introduction
- Letters: A Case Study
- Successful Email
- Business Reports
- Proof Reading
- Reference

Study Skills Success

- Listening
- Speaking
- Reading
- Writing

WORKSHEET ON PARTS OF A BUSINESS LETTER (Sessions 1 &2)

Fill in the blanks with appropriate parts of a business letter:

1. _____ is the place for the writer to handwrite their name.
2. The recipient's name, company name, and address are called the _____.
3. The purpose of the letter is included in the _____.
4. Yours truly, is an example of a _____.
5. The last line in a business letter is the _____.
6. The _____ is when the letter is written.
7. The _____ is the address of the letter writer.
8. Dear Mr. Johnson is a _____.
9. Write your own formal business letter, using a separate piece of paper. Include all parts of a formal business letter and be sure it is in the correct format. There should not be any spelling or grammatical errors and it must be written in clear, concise language.

EXERCISE ON PASSIVE VOICE (Sessions 2&3)

Complete the following sentences with the passive form of the verb in brackets.

Example : The bills (pay) every month. => The bills are paid every month.

- 1) English (speak) in this hotel.
- 2) Over 100 meals (serve) every day.
- 3) Each lesson (follow) by an exercise.
- 4) Dictionaries can (borrow) at the library.
- 5) Smoking (not/allow) in this building.
- 6) Taxes (include) in the price.
- 7) A new version (publish) every year.
- 8) More and more mobile phones (steal) every day.
- 9) A lot of information can (find) on the Internet.
- 10) A confirmation email (send) to every subscriber.

WORKSHEET ON REPORT WRITING (Sessions 4-6)

TOPIC:

**HOW INDIA CAN ACHIEVE STATUS OF AATMNIRBHAR
BHARAT**

SUBJECT : 'THE ANALYTICAL STUDY ON HOW INDIA CAN ACHIEVE STATUS OF AATMNIRBHAR BHARAT'

Respected Sir,

This letter is in reference to your letter no. SGSITS/12121/2020 in which you have asked us to make an analytical study on how India can achieve status of 'aatmnirbhar Bharat'. We would like to present our findings and recommendations concerning the same. We hope that this report will give you an insight of today's India and how to achieve a goal of aatmnirbhar. We hope that this report grants enough information that facilitates proper decision making.

Yours faithfully

Manmay Maheshwari

Vi. Preface

After the 75th year of independence day of India or “azadi ka amrit mahotsav”, we bring you a report on self-reliant India which will have a major impact on the economy of the country. We bring you a report on how India can achieve the status of Aatmanirbhar Bharat. Self-reliant India or Atmanirbhar Bharat Abhiyaan is the vision of new India envisaged by the Prime Minister Narendra Modi. On 13th May 2020, Mr Modi had raised a clarion call to the nation giving a kick start to the Aatmanirbhar Bharat Abhiyaan and announced the Special economic and comprehensive package of 20 lakh crore rupees – equivalent to 10 per cent of India’s GDP to fight unemployment and economic declination due to COVID-19 pandemic in India.

Prime Minister has also stressed on becoming Aatmanirbhar in Defence Manufacturing. Addressing a seminar on Aatmanirbhar Bharat in Defence Manufacturing, on 27th August last year, Mr Modi had said that “the Government aim is to boost defense production, develop new technology and Give significant roles to private players in the defense sector.”

We have made our report on the five pillars, Economy, Infrastructure, System, Demography and Demand. Atmanirbhar Bharat will make India self-reliant by creating an ecosystem that will allow Indian companies to be highly competitive on the global stage. The government has taken several bold reforms such as Supply Chain Reforms for Agriculture, Rational Tax Systems, Simple and Clear Laws, Capable Human Resource and Strong Financial System. The Make in India spirit embedded in the Aatmanirbhar Bharat Abhiyaan has resulted in providing resilience and self-sufficiency to the country for various medical equipment including Personal protective equipment, PPE. In this report we have included various tools to achieve the goal of making India a self reliant country. We have focussed on different aspects which can be beneficial for the country's growth and can make our nation a developed nation.

vii.Acknowledgement

“Presentation inspiration and motivation have always played a key role in the success of any venture.”

We would like to express our sincere thanks to our institute SHRI GOVINDRAM SEKSARIA INSTITUTE OF TECHNOLOGY AND SCIENCE,INDORE for introducing such a fantastic curriculum and activities for our development and growth.

We feel to acknowledge indebtedness and deep sense of gratitude to Dr. SARIKA TIWARI MAM to not only provides us the opportunity to prepare this adorable project but whose valuable guidance and kind supervision given to us throughout the course has shaped our present work.

We would also pay our deep sense of gratitude to Ms. ARZOO CHAUBEY MAM and Dr. NEHA MOTWANI MAM of the department. For their comments and valuable suggestions towards improvement of our report.

We are immensely obliged to our friends for their elevating inspiration, encouraging guidance and kind supervision in the completion of our report.

Last, but not the least, our parents are also an important inspiration for all of us. So with due regards, we express our gratitude to them.

Thank you!

x. Abstract/ Summary

Atmanirbhar Bharat Abhiyan is the new version of 'Make in India' which was announced by the Hon'ble Prime Minister on 12th May 2020 with a new vision.

The detailed announcements were made in a five days relief package by the Finance Minister Nirmala Sitaaraman to mitigate the negative effects of the COVID-19 pandemic. She clarified that it doesn't aim to adopt protectionism against other countries. Those sectors which require FDI and foreign technology are always welcome. In the critical situation of pandemic when international movements of goods and services prohibited, India showed the independent skill of manufacturing PPE by growth of this sector from zero to 1,50,000 pieces a day by the beginning of May, indicating the capacity of Self-reliance. The paper focuses on those sectors and areas which have potential to achieve self-reliance in the future. It tries to analyze the limitations and bring out the various suggestions to utilize the existing capacity for becoming a global supplier.

This report attempts to quantify the impact of the campaign on the Indian Economy by studying major indicators like FDI, GDP (Gross Domestic Product), Trade Openness, Exchange Rate etc. Using basic econometric tools. This report also attempts to develop some recommendations to the government based on the predictions and show the future of the campaign provided that it continues with the present vigor. We conclude that the campaign has been a success so far mainly because it is backed by major legislative and bureaucratic Reforms and has a great potential to succeed in future too.

2 . Main Text:

xi. Introduction

In October 1919, Gandhiji gave a speech at Bhagini Samaj, Mumbai. In that speech, he stressed the need for making India Atmanirbhar.

According to our Hon'ble Home Minister Shri Amit Shah, Make in India, Atmanirbhar Bharat is the new definitions of Mahatma Gandhi's Swadeshi movement. A simple "charkha" symbolised "self-reliance" and "swadeshi" during the Independence movement. Like Bapu's swadeshi, the concept of Aatmanirbhar Bharat is based on love and compassion for our local products, without any hatred for imported items. This love, would lead to rise of local brands to the global level. When 130+ billion Indians become "vocal" about "local" products, its sound could be heard globally, placing Indian products on the world map.

Atmanirbhar Bharat Abhiyaan or Self-reliant India campaign is the vision of new India envisaged by the Hon'ble Prime Minister Shri Narendra Modi. On 12 May 2020, our PM raised a clarion call to the nation giving a kick start to the Aatmanirbhar Bharat Abhiyaan (Self-reliant India campaign) and announced the Special economic and comprehensive package of INR 20 lakh crores equivalent to 10% of India's GDP – to fight COVID-19 pandemic in India.

The aim is to make the country and its citizens independent and self-reliant in all senses. He further outlined five pillars of Aatmanirbhar Bharat – Economy, Infrastructure, System, Vibrant Demography and Demand. The Finance Minister further announces Government Reforms and Enablers across Seven Sectors under Aatmanirbhar Bharat Abhiyaan. The government took several bold reforms such as Supply Chain Reforms for Agriculture, Rational Tax Systems, Simple & Clear Laws, Capable Human Resource and Strong Financial System.

India is a nation which claims to have a huge amount of natural resources. The country boasts its skilled and unskilled workforce having the requisite skill and determination. Labor here is aplenty. With all eyes on the east for outsourcing activities, India aims at becoming a preferred manufacturing destination for its partners as well as new investors. To tap this opportunity, atmanirbhar bharat was launched as a marketing campaign with an objective to attract existing stakeholders as well as idian and foreign investors to invest and choose India as their manufacturing place. In order for a complete manufacturing transition, the country needed a strategy that empowers and enables in an unvarying manner, to attain global competitiveness. Thus, it was

imperative to welcome capital and technology across the globe to make the foundation of the program. The program aims to increase the share of the manufacturing sector in the Gross Domestic Product (GDP) from 16% presently to 25% by 2025. With 25 target sectors ranging from automobiles to IT and business processes, the campaign seeks to enhance job creation, move up the ease of doing business ladder, foster innovation and promote development of skills. In this process, the nation aims to attract Foreign Direct Investment (FDI), with a promise to the investors for making it a pleasant experience with minimum bureaucracy. To make the program a success, the country needs to be in line with the foreign technology as well as capital. With gradual inflows of funds and expertise from outside the border, India will be able to make a huge chunk of its GDP out of manufacturing. The presence of a huge jobless crowd explains the urgency to launch this program. Continuous engagement of the manpower in the aforesaid sectors is expected to reduce the number of the unemployed. With the opening of new sectors like Defense and Railways, the program is expected to give a long term benefit rather than short term results. After the initiation of the campaign, transparent and user-friendly systems have taken the place of obsolete and slow processes to drive investment proposals.

xii.Discussion

THE NEED OF ATMA NIRBHAR BHARAT

India is dependent on lots of imports from many countries across the world and pays a large import bill in comparison to export. During the time of pandemic all the import and export activities across the world was on halt. Transportation on goods and services were stopped. Then it was very difficult to live without resources as import of goods were not possible due to termination of transport activities.

India faced problems in terms of shortage of Hospital beds, PPE kits, Covid test kits, medicines, ventilators and other necessary respiratory and medical equipments including basic supplies of hand sanitizers, N95 Masks. We realized that it is the time for us to depend upon indigenous Innovation, products and local manufacturing. To fulfill these demands and promote production of these items in the country our Prime Minister Shri Narendra Modi started Aatma Nirbhar Bharat Campaign. He defined the concept of Aatm Nirbhar Bharat to boost the economy and to turn difficulties into opportunity.

Due to COVID-19 pandemic India experienced declining international trade which gave an idea to achieve self-reliance in some sectors and to become a global supplier. In 1991 fiscal crisis, BOP crisis, hyperinflation led to the launch of a new policy called LPG i.e.Liberalisation, Privatisation and Globalization. Similarly, since March 2020 whatever situation was faced by the world as well as India due to COVID-19 gave a new concept to emerge that is self reliant India. With the impact of COVID-19, many countries are adopting protectionist policies.India is a developing country; therefore, it is very difficult to adopt protectionism. But in some sectors in which we have potential to achieve self reliance, we can impose trade barriers to protect and develop domestic industries. As mentioned by the government, 12 sectors include auto components, textiles, industrial machinery and furniture, food processing, organic farming, iron, aluminum and copper, agro - chemicals, electronics, leather and shoes. Masks, sanitizers and ventilators have been identified to give more focus to become a global supplier. It has been seen that these products have a comparative advantage as they can be produced domestically at low cost. India has huge potential in Agro chemicals, Pharma &API's(active pharma ingredients) too.

Foreign secretary Shringala said that "The idea behind self-reliance or Atmanirbhar is not to become an isolated country but on the contrary it is to ensure that India can emerge as the global nerve center of the complex modern multinational supply chains. Pandemic situation gave India a new opportunity to become a demonstrated and leading country in front of the world by localizing their product and by improving supply chains to meet internal demands." Foreign Secretary while addressing the Federation of Indian Chambers of Commerce and Industry in New Delhi said that "India

now has an opportunity to diversify global supply chains. In these changing times with an integration of supply-demand basics with highly diversified value chains, emerging technologies and artificial intelligence, present us with an important opportunity for other country and mitigate the supply chain disruptions with the increased use of innovative digital platforms and applications."

Pharmaceutical Industry: In 1969 Indian pharmaceutical industry had a 5% share of the global market. By 2020, it is the reverse, now Indian pharma is having an almost 85% share of the global market. Over the last more than 50 years, India has been successful in meeting the domestic market and has a potential to play the role of 'pharmacy of the world'. According to Pharmexil. India exported pharma products worth of \$200.02 million in financial year 2018, with a recorded growth of 37.52%. Excess dependency on China for APIs need to be reduced because continuous increase in import of raw materials from China shows alarming situation for Indian Pharma industry. In 2015, Dr.V.K.Subburaj, Secretary, Department of Pharmaceuticals highlighted to achieve self sufficiency in APIs. In 2018, Chemical and Fertilizer Ministry along with other ministries joined hands to increase the production of APIs domestically to reduce dependency on China. To grasp the real potential of the industry and to speed up the available opportunities, the Indian pharma industry is producing as per market demand and spending more on R&D. Existing policies require to be more friendly which enable local industries to manufacture the core of the industry. Many of the top Pharma companies already set up their plants in Visakhapatnam for manufacturing APIs to access the sea routes and airports and make it a more focussed Centre of Excellence for Pharma sector. The Indian Pharma industry has been growing steadily from the past few years as seen in the following table:

Steady Trend Value Growth in %						
	2014	2015	2016	2017	2018	2019
Indian Pharma Market	8	15	11	8	7	9
National List of Essential Medicines (NLEM)	-9	10	5	-6	3	6
Non NLEM	11	16	12		7	10

India has faced the COVID-19 situation with fortitude and a spirit of self-reliance, which is evident in the fact that from zero production of Personal Protection Equipment (PPE)

before March 2020, India today has created a capacity of producing 2 lakh PPE kits daily, which is also growing steadily.

Additionally, India has demonstrated how it rises up to challenges and uncovers opportunities therein, as manifested in the re-purposing of various automobile sector industries to collaborate in the making of life-saving ventilators. The clarion call given by the Hon'ble PM to use these trying times to become Atmanirbhar (self-reliant) has been very well received to enable the resurgence of the Indian economy. Unlock 1 Guidelines have been issued to enable resumption of economic activities while maintaining abundant caution thus allowing graded easing of restrictions.

The Five pillars of Atmanirbhar Bharat focus on:

- 1.Economy
- 2.Infrastructure
- 3.System
- 4.Vibrant Demography and
- 5.Demand

The Five phases of Atmanirbhar Bharat are:

Phase-I: Businesses including MSMEs

Phase-II: Poor, including migrants and farmers

Phase-III: Agriculture

Phase-IV: New Horizons of Growth

Phase-V: Government Reforms and Enabler

The current state of the world has made us realize self-sufficiency is the only path for development. For many, this concept seemed covalent and put them in a tizzy.

So, the literal meaning is self-independence, where India needs to make sure that the 21st century belongs to it. COVID-19 has provided an excellent opportunity to prove our mettle in a world that is like a family. Rural India was left on its devices when the lockdown was imposed. Their challenges were different than in urban areas. The

people who migrated to the cities for the job were left starving, which coerced them to return to their homes.

Since India is an agrarian economy, availability of labour and machines, fear of police and lack of family labour caused significant hurdles in the harvest of several crops. Furthermore, they faced challenges in threshing, storage, transportation, closure of markets and mandis. Rubber and tea plantations in Kerala and Assam suffered a considerable loss due to the halt in farm operations.

The restricted mobility has obstructed the sales of vegetables and fruits. In such situations, the idea of Atmanirbhar Bharat seems futile. The intended objective of this concept is two-fold. First, for the poor people, interim measures like liquidity and direct cash transfer are released, which will act as shock absorbers. Second, the plan is to bring reforms in the growth-critical sector to make it globally attractive.

When these measures are applied, then it will revive the economic activity and create opportunities in micro, small, agriculture and medium sectors. Also, it will bring substantial growth in power, coal, defense, aviation and mining. The scheme formulated is a one-step towards the one nation one market and helps India emerge as the food factory of the world.

The MGNREGA may help the distressed migrants in villages due to the infusion of 40,000 crore. For finance-starved sector, Rs 3 lakh crore has been provided as a collateral-free loan facility. As the MSME (micro, small and medium enterprise) is the largest employment generating sector, this plan would ensure their sustenance and thereby help in India comparative advantage. Moreover, the newly launched PM e-vidya programme will secure schools, colleges and universities as it will assist them in conducting online courses without further loss in teaching. The expenditure on health will be increased by ramping up health and wellness centers in rural and urban places. A sum of rupees 3 lakh 10 crores is to be provided to dairy, animal husbandry and fisheries.

Also, the coal sector, minerals and space sectors will receive a sum of 48,100 crores. Though the plan seems promising, many hurdles need to be addressed before implementing these ideas. The pandemic is similar to the 1991 crisis which witnessed a shift via liberalization, privatization and globalization. The post pandemic time will be provided unprecedented opportunities only if the implementation is carried adequately.

- Graph shows how pandemic affected GDP of India

'AATMANIRBHARKHETI'-INDIA'S EXPORTS AND IMPORTS OF AGRICULTURAL PRODUCE

INITIATIVES

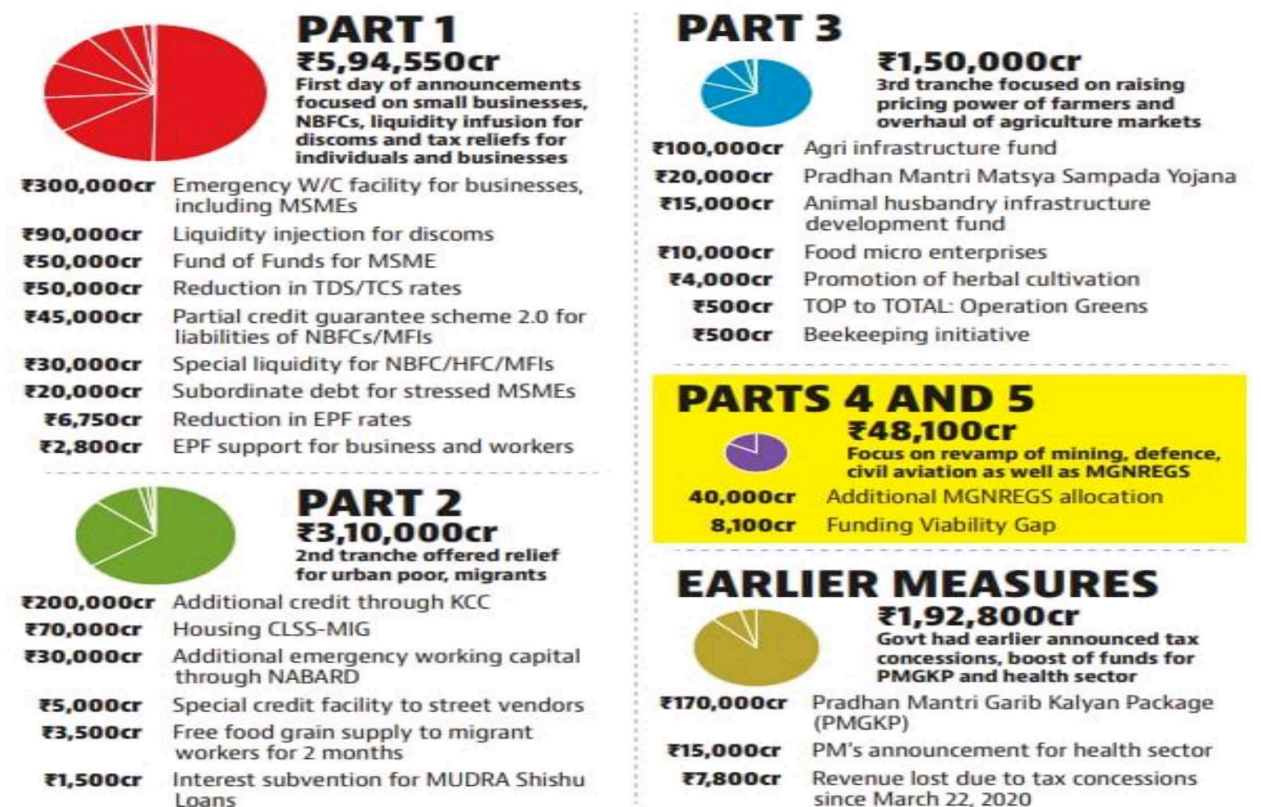

To make Aatm Nirbahr Bharat Abhiyan more successful Indian Government has announced bailout packages and support packages to various sectors to increase liquidity in the market. Our Prime Minister Shri Narendra Modi announced the economic package along with various packages. These packages that were released during the lockdown was around US\$ 283.73 billion, which is about 10 per cent of India's GDP. The economic package was expected to provide support and strength to various sections of the country. It will also give a renewed boost to the development

journey of the country in 2020. In order to prove the determination of a self-reliant India, Land, Labour, Liquidity and Laws have all been emphasized in this economic package. Essay on Aatm Nirbhar Bharat

One of the most important recommendations of Aatm Nirbhar Bharat packages is that for upto 200 Crores of Tenders, now global tendering is not required. This will be beneficial for Indian companies and its competitiveness will also increase

Long term Benefit of Aatm Nirbhar Bharat Abhiyan.

Aatm Nirbhar Bharat Abhiyan promoted various innovations and new products development in India. By this import of India will decrease and export will increase thus in the long run our trade deficit will reduce. Export promotion will help us save foreign currency and earn more foreign currency. Aatm Nirbhar Bharat package will help in growing Indian small and medium enterprises and the manufacturing sector will flourish. This program will help in achieving "5 Trillion economy" vision of Indian Government.

xiii. Conclusion

“A self reliant India is also a reliable friend for the world”

Atmanirbhar Bharat Abhiyan is a long-term concept. In the short-term it is very difficult to achieve because since 1991 all economies have been integrated under LPG policy. From the above study it is concluded that the Indian Economy has huge potential to achieve self-reliance but it requires proper implementation of laws made by the government and proper allocation of funds allotted by the government. Not only urban, but rural sectors also have great capacity to develop if proper policies are made and implemented. Government should give all the facilities to develop those sectors which have potential to take innovative steps. This is not only the government's responsibility but also consumers' responsibility to consume domestically produced goods because demand is the main determinant to develop any sector. India is not only capable of producing basic products but also has the capacity to produce highly technical products.

This paper concludes that the government has been successful to a great extent in terms of positioning India as a global manufacturing hub not only on the basis of slogans and propaganda, but on the basis of the small steps taken in every sphere of the economy. These small actions, from reducing the export formalities to setting up an Investor Facilitation Cell, have been the real catalysts behind this campaign and are at its core. It is also evident that the campaign has great opportunities for India's future and hence must be pursued with equal vigor in the coming years. However, the government also needs to strike a

balance when it comes to spending money on infrastructure and should use the Public Private Partnership Model as an alternative to the same. Many other researches on this subject have reached a similar conclusion. There is a lot of scope for further research on this topic mainly at this time ,when everyone is looking at India as it has the power to change the world.

xiv. Recommendations

The objectives of the Abhiyan could be fulfilled by adopting some measures. As government allotted huge amounts for the development of many sectors and schemes but there is need for the proper allocation of the funds generated and it should reach the actual hands. The poor population is severely affected by natural calamities and pandemics. Therefore, the country should be prepared for facing natural and economic challenges. Success of any idea and policy depends on good governance and appropriate mechanism for implementation of that policy. To become self-reliant and global supplier it is necessary to increase quantity as well as quality of the commodity, so that we can deploy the benefit from the opportunity diverted from China. For the successful implementation of the schemes mentioned in Abhiyan, it is must to recognize the actual potential of various sectors existing in urban and rural India and provide them sufficient resource.

3. Back Matter:

xvi. Appendices

- ❖ GoI has announced increasing the FDI in Defence sector from 49% to 74% to attract foreign investments for setting up of R&D and infrastructure facilities in Defence sector.
- ❖ To encourage joint manufacturing of equipment in India, the government has initiated measures for setting up of JVs. JVs in the defence sector have been established including three with Russia, viz IRRPL, IRHC and Multi-role Transport Aircraft Ltd.
