1. INTRODUCTION

This chapter should contain brief background information about the project, the methodology implemented for problem-solving, and the outlines of the results and future scope of the project. It rarely contains drawings and graphical illustrations.

2. LITERATURE REVIEW

It evaluates the current work with the previous one. It depicts the current implementations that overcome the previous problems and limitations of the project, and draws the attention and focus on the foreknowledge work that would be conducted based on the ongoing work at present. It must be clear and simple to understand.

3. METHODOLOGY

Essentially, a methodology is a collection of methods, practices, processes, techniques, procedures, and rules

Explain your methodological approach.

Describe your methods of data collection and/or selection.

Describe your methods of analysis.

Evaluate and justify your methodological choices.

4. EXPERIMENTATION

Write the experimental procedure like a step-by-step recipe for your science experiment. A good procedure is so detailed and complete that it lets someone else duplicate your experiment exactly!

5. RESULT AND DISCUSSION

This section should be written in the present tense. The Discussion section needs to follow from your results and relate back to your literature review.

Interpret and explain your results.

Answer your research question.

Justify your approach.

Critically evaluate your study.

6. CONCLUSION

The conclusion and recommendations part summarizes the whole report by highlighting all the chapters and their significance and the importance of the project and the achievements.

7. FUTURE SCOPE

Scope for future development if any
